

Cable Placement Release Form

In a continued effort to protect your underground utilities, it is important that you understand the placement process of the following services: Telephone, Internet and/or TV Cable installation.

Before Benton Telephone Company/Benton Cablevision buries the underground cable, we flag a proposed route. We then call Gopher State One Call which locates the commercial utilities buried near our proposed route. It is the owner's responsibility to notify Benton Telephone/Benton Cablevision of any other service that might be placed underground by completing the diagram below. An example would be privately placed facilities such as gas, electric, sewer, well, sprinkler systems, underground wiring, etc.

If you have any concerns with the proposed route or any questions, please contact us at (320) 393-2115 or (800) 683-0372.

I, _____, assume all responsibility for my privately placed underground facilities (gas lines, electric, sewer, well, sprinkler system, underground wiring, etc) located on my property upon which Benton Telephone/Benton Cablevision is going to bury cable. It is my responsibility to inform the company by completing the diagram below regarding the location of these private underground facilities. If damage should occur because of undisclosed privately buried facilities, the repairs will be at the property owner's expense.

Name: _____

Current Phone # (if applicable): _____

Address of Underground Installation: _____

Signature

Date

PLEASE DRAW A DIAGRAM OF YOUR BURIED SERVICES BELOW
